**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 10 November 2003.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 22-26 and 28-31, are rejected under 35 U.S.C. 102(b) as being anticipated by Walker (US 5,788,510 and Examiner's Attachment from previous office action).

Regarding claims 22-26 and 28, Walker disclose an electrical connector (20), comprising:  
a dielectric housing (30) including a peripheral wall surrounding a rising above an array of contact receiving passageways (56) and having a perimeter edge (32);

a plurality of separate surface mount contacts (58);

area of reduced rigidity (E1) in portion of the peripheral wall (see Figure 1).

Walker silently about the reduced rigidity area at which stress is built up is for preventing warpage problem of the housing. However, this feature is seen to be an inherent teaching of that device since a means of the removed portion of the peripheral wall is disclosed, and it is apparent that some type of warpage prevention must be presented in order for the device to function as intended.

Regarding claims 29-31, the method claims are deemed inherited.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Walker (US 5,788,510).

Walker substantially disclose the claimed invention except the mount contacts comprise solder balls. It would have been obvious to one having ordinary skill in the art at the time the invention was made to not having a solder ball in the connector, since it has been held that omission of an element and its function in a combination where the remaining elements perform the same functions as before involves only routine skill in the art. *In re Karlon*, 136 USPQ 184.

***Response to Arguments***

Applicant's arguments filed November 10, 2003 have been fully considered but they are not persuasive. Because:

A rejection base on "inherency" means that if a device has substantially the same structure as the device has been claimed then it would produce the same effect under any circumstance.

Walker's connector does have the same structure as the claimed invention then it would produce the same effect if it would ever be involved in a reflow process.

*Conclusion*

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
